

PERSONAL EXPENSE TRACKER

- Suhani Sanjay Shinde (B30)
- Mayuri Ravindra Mane (B19)

INTRODUCTION

This project is an effective tool for personal finance management and demonstrates fundamental skills in GUI programming with Tkinter. It provides a practical solution for tracking and managing expenses and can be expanded with additional features for enhanced functionality.

Built using Python and
Tkinter

Purpose: To help manage
personal finances
effectively

KEY FEATURES

❑ ADD EXPENSE

Input item
name, amount,
and date

❑ DELETE EXPENSE

Remove
selected
expenses

❑ EXPENSE LIST DISPLAY

View all
expenses with
details

❑ SET TOTAL SAVED

Define the total
amount saved
for the month

❑ REMAINING AMOUNT DISPLAY

Monitor the
available funds

IMPORT STATEMENTS

```
import tkinter as tk
```

```
import tkinter.messagebox as  
mb
```

Explanation: Tkinter for GUI,
messagebox for error messages

GLOBAL VARIABLES

expenses: List to store
expense records

total_saved: Total amount
saved for the month

remaining_amount: Amount
remaining after expenses

Add Expense Function

- Retrieves user input
- Validates input and checks amount against remaining
- Adds expense to the list and updates the remaining amount
- Refreshes the UI

Set Total Saved Function

- Sets the total saved amount from user input
- Calculates the remaining amount
- Refreshes the UI

Delete Expense Function

- Removes selected expense from the list
- Updates the remaining amount
- Refreshes the UI

▣ UPDATE UI FUNCTION

- Clears the Listbox
- Inserts current list of expenses into the Listbox
- Updates the remaining amount label
- Clears input fields

▣ TKINTER SETUP

- Creates the main window
- Adds labels, entry fields, buttons, and Listbox
- Starts the Tkinter event loop

USAGE INSTRUCTIONS

- Set Total Saved: Enter total saved amount and click "Set Total"
- Add Expense: Enter item name, amount, and date, then click "Add Expense"
- Delete Expense: Select an expense and click "Delete Expense"
- View Remaining Amount: Displayed at the bottom, updates automatically

FUTURE IMPROVEMENTS

- Data persistence using a database or file
- Support for multiple users
- Additional features: Expense categories, detailed reports

CONCLUSION

The **Personal Expense Tracker** is a user-friendly Python application developed with the Tkinter library, designed to help individuals manage their personal finances. The application offers a straightforward interface for tracking and managing expenses, setting monthly savings goals, and calculating the remaining balance after expenses.

The screenshot shows a window titled "Expense Tracker" with a standard Windows-style title bar (minimize, maximize, close buttons). The window has a light gray background. At the top, there is a label "Total Saved (Rs.):" followed by a text input field. Below the input field is a button labeled "Set Total". Underneath the button is a label "Item:" followed by another text input field. Below that is a label "Amount (Rs.):" followed by a third text input field. Then, a label "Date:" followed by a fourth text input field. Below the date field are two buttons: "Add Expense" and "Delete Expense". At the bottom of the window, there is a status bar with the text "Remaining: Rs. 0.00".

THANK YOU
